

## PRODUCT DESCRIPTION

The **BF PUFF SANDY GLITTER** series consists of films with extremely fine glitter applied to the surface and features a special “puff” effect that activates during thermal transfer, **tripling the thickness up to 500 microns**.

The high quality of the product ensures that the glitter remains permanently on the surface even after countless washes.

This series of heat transfer vinyls is ideal for adding ultra-bright, three-dimensional, and high-impact details on cotton garments, synthetic fabrics, blends, and elastic materials.

## APPLICATION TECHNIQUES

- Knockout (*do not overlap the liner of one color of BF PUFF with another*)
- Layering on other series

## APPLICATION STEPS

- Cut - 60° blade
- Weed excess material
- Turn on your heat press - bring the temperature to the desired level
- Pressure setting - medium
- Place your graphic on the garment
- Make sure the surface is even and there are no obstacles such as zippers, buttons or collars
- Press it - follow application instructions
- Remove the liner - hot

 For optimal results, the BF PUFF series requires the use of **an even pressure**.

**Application on Nylon and stiff fabrics is not recommended**, as they do not guarantee an optimal “puff” effect.

Due to the different chemical composition of each color, **the final effect may slightly vary** depending on the fabric used, the pressure, and the temperature of the heatpress.

## WASH RESISTANCE

First wash after application	wait 12 hours
Wash insideout	
Max wash temperature	40°C - 104°F
Dry clean	✗
Dryer	✗

## SAFETY NOTICE

The values reported in this document are average values as tested under normal conditions in our lab. We cannot provide a guarantee regarding the information abovementioned in this page. Due to possible variations in the production of garments, B-FLEX recommends testing the material prior to all applications.

## SIZES

**H 50 cm****L 25 mt / 10 mt / 5 mt**

## TECHNICAL DATA

Film: PU + PET

Thickness: 260μ (±5%)

Liner: adhesive PET

Finish: rough

Textile: cotton, synthetic, mixed and elastic

## PLOTTER SETTING

Cut settings: mirror

Blade: 60°

Minimum cut: 0,5 cm

## APPLICATION

Temperature: 130°C/150°C - 265°F/305°F

Pressure: medium - 3,5 bar - 50 PSI

Time: 8" - 10"

Liner removal: hot
