

FLAT HEAT PRESS | EHP SERIES (Clamshell Heat Transfer Machine)

EHP Pneumatic (large format)

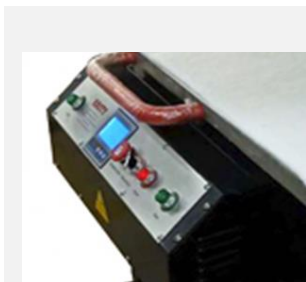

EHP (small format)

Easty EHP is a large format clamshell heat transfer press intended for more automatic and higher printing pressure need than the manual version. EHP pneumatic press provides an oversized platen, a better production-oriented press with a single front-loading table, and high pressure pneumatic lifting system, which is ideal to meet various dye sub needs.

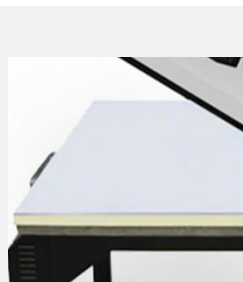

EHP clamshell press opens much wider and up away from the rear side of the pads, staying away from operators' hands. The extra-long wide handle and smooth gas shock lift give you the easiest and safest heat press to operate on the market.

If you're interested in saving cost on quality heat presses and having efficient operation, or concerned about high cost of maintenance, then one or more EHP heat press machines will be right for you. EHP is equipped with state-of-the-art control system, heavy-duty solid steel welded framework, platen & heat-control electronics. Its advanced embedded heater winds tightly and closely together throughout the entire platen for extremely even heat, fast recovery & heat up time.

AUTO-RELEASE upgrade makes EHP wide format heat presses semi-automatic "Pop-Up" machines and ease of use. Easty presses open much wider and lift up far away from the rear of pads, staying away from hands.

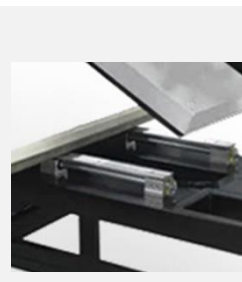

Control Panel

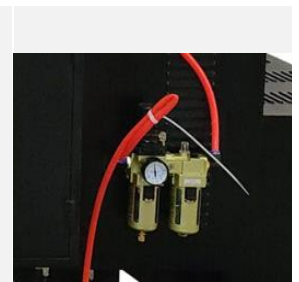

Sponge of platen

Pneumatic Cylinder

Track of platen

Adjustable Pressure

Applications

Large fabrics & piece goods
 Full-bleed printed sportswear panels
 banners, floor mats, carpets, mouse pads and more.

Features

- Automatic design: Magnetic or pneumatic space-saving clamshell with sliding table
- User-Friendly Display: Intelligent, easy-to-read LCD for temperature and timer settings
- Convenient operation: Slide way and 3-way-open design and wide opening for easy layout
- Quality Construction: Strict CNC quality steel framework, offering a budget-friendly option for users
- Even Heat Distribution: Over-the-Center Pressure Adjustment ensures even, edge-to-edge heat and pressure, regardless of substrate thickness
- Extra-long & wide handle Smooth shock opening
- Non-Stick Platen: Scratch-resistant, Teflon-coated non-stick heat platen for safe and easy use
- Reliable Performance: Stable and excellent performance, manufactured according to CE standards

Specifications

Small Format	Working Size + system	Power	Packing Size	G.W.	Voltage
EHP-3838	38*38cm (15"x15") magnetic	2.5kw	76*61*67cm (30"x24"x26")	48kgs (106lbs)	110V/ 220V
EHP-4050	40*50cm (16"x20") magnetic	2.8kw	86*61*67cm (190"x24"x26")	53kgs (117lbs)	
EHP-4060	40*60cm (16"x24") magnetic	3kw	96*61*67cm (212"x24"x26")	58kgs (128lbs)	
Large Format	Working Size + system	Power	Packing Size	G.W.	Voltage
EHP-8010	80*100cm (32"x39") magnetic/pneumatic	6.5kw	1300*825*1250cm (512" x 325" x 492")	300kgs (661lbs)	110V/ 220V
EHP-1010	100*100cm (39"x39") magnetic/pneumatic	9kw	1550*1050*1250cm (610" x 413" x 492")	400kgs (882lbs)	
EHP-1012	100*120cm (39"x47") Customized Version	TBC	TBC	TBC	

- Parts are eligible for 1 year warranty under proper use (from EXW-factory time), not include consumables
- Other machine sizes available upon request
- Machine produced according to CE rules
- HS Code: 8443399000
